May-WRPS Nurse

2024

One month left!!

May is **NATIONAL ASTHMA AND ALLERGY AWARENESS**

MONTH! It is the peak season for asthma and allergies. We have already had several warmer days and this will continue so please make sure your student has any needed medication (inhalers, antihistamines) at school to help combat allergies.

**Any inhalers at school will need a doctor's order. Review your child's asthma action plan with the school nurse as needed. High school students: may self-carry inhalers with a doctor's order allowing self-carry and may carry their over-the-counter store-bought medications (Tylenol, Ibuprofen, etc), but must be in the original container.

!! Did you know: From Asthma & Allergy Foundation of America (AAFA) !!

The most common asthma triggers include allergies, air pollution, and other airborne irritants, other health conditions include respiratory infections, exercise or physical activity, weather and air temperature, strong emotions, and some medicines. Asthma triggers vary from person to person. Some people react to only a few while others react to many. Keep in mind that dry wind, cold air, or sudden changes in weather or temperature can sometimes bring on an asthma episode.

*****MEDICATIONS*****

As we near the end of another school year, we would like to remind you that any over-the-counter medications, EpiPens, and inhalers that your student has at school will be sent home with them at the end of the year. **Any controlled medication (seizure or ADHD) will need to be picked up by a parent/guardian or other adults. If any extra medication is not picked up by the end of the year, it will be properly disposed of.**

Creating Trauma-Sensitive Schools to Improve Learning, Wisconsin DPI

Professional Educators know that many students face challenges in their personal lives that Adversely affect their learning in school. Unfortunately, many children have been traumatized by directly or vicariously experiencing violence, homelessness, loss (or fear of loss) of loved ones, or other kinds of devastating experiences.

Trauma changes people. Just as physical assault on the body can cause bodily impairment, psychological trauma can result in a mental injury that impacts such things as a child's ability to regulate emotions, attend to classroom activities and/or achieve normal developmental milestones. However, this does not mean that traumatized children and adolescents cannot grow up to be healthy and happy adults, despite the often substantial obstacles they face.
