

Let's create a list of the best apps for Music Teachers and Students. Please help populate the list. Feel free to add more columns if you'd like. THANKS!

Name of App	Best Features	Seems to be lacking ...
Audacity	Not an app but a must for anyone recording and wanting to edit with a free open source platform	
AutoRap	Turn your speech into rap and/or rap over a catalogue of beats.	Free but premium lets you rap over popular beats
Band	Gives you a few instruments including one big set that lets kids play with 12 bar blues	Not infinite in choices, a bit prescribed
Cadenza	Practice your recital music with beautiful accompaniments that listen to you—and turn pages for you	
DM1	Visually representative of the subdivision of beats. Cool drum machines	
Drillbook	Field view for marching band, can load shows or just pdfs of sets	
Drum School	Must have for drum set players	
flat.io	Collaborative composition tool.	
GarageBand	Loops, Layers, AutoPlay - Multiple entry points for musicians of all levels.	Web-based option
Google Classroom	Students can upload performance assessment videos, listen to recordings, respond through GAFE	
iKaossilator	Create Electro-House music successfully with an expressive X-Y control	
Incredibox	Quick musical fun, quick sharing with others. But also a great demo of looping fundamentals, the "math" of music. http://www.incredibox.com/v4/	"App" version. (They are working on it.) & a ready way to layer user voices.
iReal Book	Must have for Jazz Teachers and students	
iShred	Preloaded songs and kids push one button to chord, can learn progressions	Doesn't address chord structures as much as apps like Pocket Guitar
Launchpad	Beat pad(Hip Hop & Electronica) that works w/Novation Launchpad S hardware but works standalone as well	Free but premium lets you input custom beats to each button
Loopy HD	User friendly, combine layers of sound quickly	
MadPad	Remixing environmental sounds.	
Monster Chords	Great for kids that wants to learn to play the guitar, but want to avoid boring practices. It teaches chords in form of games so kids practice while having fun.	It's currently only on iOS
Music Minded	Great for students learning recorder. Lots of interactive movies and games to help kids learn at home.	\$14.99 (it showed up on AppsGoneFree one day last year and my kiddos snatched it up!)
NoteFlight.com	Another web based notation program that can help students with creating traditional print music and hearing what they create.	Subscription required for some advanced features
Ocarina	Turns iPad/phone into woodwind instrument. Four finger positions, tons of music online 4 free	limited range perhaps
Pocket Guitar	On a phone the fretboard is nearly the same size as real one. Chord structures are same as real.	Can only fit a few frets
Real Piano HD	Allows you to adjust the tuning so band members can play their music on the piano in their tuning	
Sight Reading Factory	Create customized sight reading exercises.	subscription required
Smart Music	Great for performers to have a full performance ensemble to practice their part with	It is another that requires a subscription per student
Smart Music	Play along app - A+ Standard in Music Education	Paid service
Smithsonian Folkways	FREE Lesson Plans for Multicultural music for all ages	Not all countries are represented
SoundCloud	Upload your recordings for all to hear and share.	
Soundtrap	Kind of like Garageband for devices such as Chromebooks. Web based. Collaborative.	
String Tuner	Great tuning app that sounds each string for each string instrument	
Tempo	Metronome - every musician needs a metronome on their smart phone or tablet	
Tenuto	Customizable exercises and lessons to work through basic music theory concepts and ear training	This is a pay version, but Musictheory.net is the free web based version.

Let's create a list of the best apps for Music Teachers and Students. Please help populate the list. Feel free to add more columns if you'd like. THANKS!

Name of App	Best Features	Seems to be lacking ...
ThumbJam	Performance interface. Many cool sounds - set to diatonic or different modes.	
Tonal Energy	Strobo-tuner, includes tuning adjustments, tone generation, etc.	\$3.99
Traktor DJ	DJ app - nice. Create markers in songs to snap back to.	
Tunable	Tuner - every musician needs a tuner on their smart phone or tablet	
UkeTabs	Great app that has most of lyrics to songs as well as UkeTabs to accompany the song. Has a cool feature to scroll along while you're playing.	To avoid copyright, the words are * out a lot and makes it hard to read the words if you don't already know the song.
Ukuele	Be able to play chords without knowing anything about Uke.	
Urban Play	Play along app for Wind Instruments by Buffet - Free - Cool, Hip, Modern - currently Free	
VideoStar	Be able to record video WHILE music is playing at the same time.	
Voiceband	Lets kids hum into their phone/iPad and turn voice into instruments. Recorder built in.	Little more complex than tutorials make it look
WebMusic	Write music notes on a staff and see the recognition results. Play what you wrote on the web.
