

253.2 REVIEW OF ADMINISTRATIVE DECISIONS

Administrative decisions are subject to review by students, district employees, and the Board of Education, as well as by parents and other school district residents. The purpose is to improve the relationship with such persons and groups and to protect them against the consequences of ill-advised administrative decisions.

Re-dress for students and employees may be sought through approved grievance procedures or through other agreeably acceptable means.

The Superintendent is directed to establish, in cooperation with relevant persons and groups, visible and efficient means for promptly handling criticisms of administrative decisions which present a continuing threat to the health, safety and welfare of students. Other complaints concerning administrative matters shall be processed in accordance with Board policy and state law.
