

## **733 ENERGY USE**

The Board of Education herein establishes energy conservation as a major priority of the Wisconsin Rapids Public School District. The Board recognizes that the conservation of energy is in the best interest of our total society, as well as our local community.

This policy is intended to reduce the use of energy in school owned facilities without adversely affecting program operations. All employees and building users share the responsibility for achieving this goal.

The energy conservation program in the Wisconsin Rapids School District shall be organized to provide for practices and procedures which minimize the use of all forms of energy in the District's facilities; a plan to reduce energy use through cost-effective building modifications; and the utilization of curriculum materials designed to inform students regarding the wise use of energy.

ADOPTED: February 1983

REVISED: June 17, 2002
