

773 DATA PROCESSING SERVICES

Data processing shall be employed only to the extent that it reduces the time and dollar costs of mechanical, routine operations. Under no circumstances shall data processing, or comparable mechanistic approaches, be allowed to interfere with warm interpersonal relations between students and staff.

Evaluation

Periodically, and at least once each year, the data processing services of the school district will be evaluated and a report given to the Board as necessary. This report shall contain, among other things, information on equipment, utilization of machines, the manner in which costs are borne and the impact upon the instructional program.

APPROVED: November 11, 1974

REVISED: June 17, 2002
