

841 PROJECTS FUNDED BY COMMUNITY GROUPS

The Board of Education recognizes and appreciates the fundraising efforts of booster clubs, parent-teacher organizations, and other ad hoc community groups for projects or programs that are of benefit to the students of the District.

Any project involving funding amounts with projected profit of over \$10,000.00 must be pre-approved by the Board of Education. Projects involving a projected profit of less than \$10,000.00 must be pre-approved by the administration.

Purchase of materials and/or construction of facilities will be as per Board of Education policies and state laws relating to competitive pricing, bidding, bonding, and related matters. Such materials and facilities will become the property of the District. For projects over \$10,000.00, all funds raised will be turned over to the District for the purchase of materials and the construction of facilities. All such projects will be managed by the District.

Final approval for projects will not be recommended to the Board until they have been 100% funded. Purchase of materials or construction of facilities cannot begin until 90% of the funds raised have been turned over to the District.
